COLLECTION 2016

# OUR PRODUCTS

The first ever 100% natural rubber sandal, no synthetics, no PVC strap like Brazilian offerings! We have women and men products, both designed to be worn for long stretches of time.

They are consistent in density/hardness (soft!) and also provide running shoe like support to the wearer. We believe our 100 % natural rubber product will provide overseas consumers with a unique, 1st time experience, that provides comfort and style in an affordable package.

We utilize African rubber, African packaging,  
African laborers, African pride  
in making our Sandals for You.

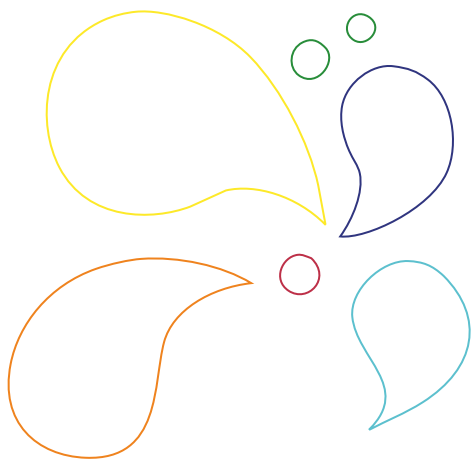

COLLECTION 2016

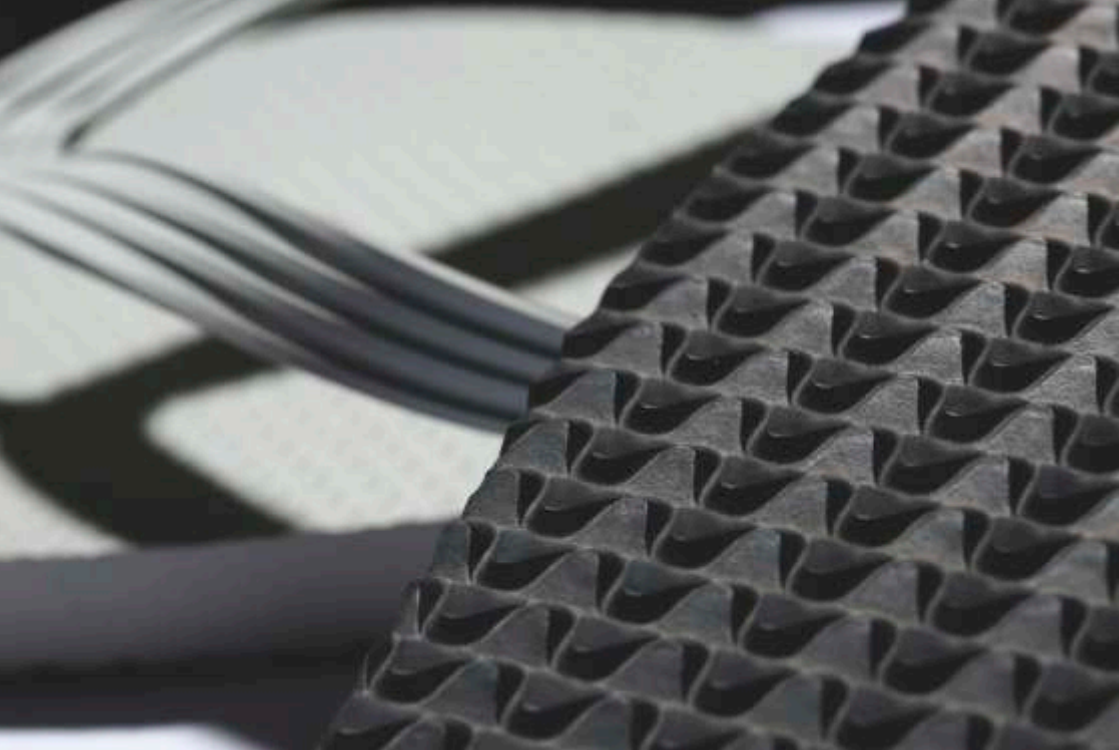

## MEN STYLES

WOMEN STYLES

The variety of colors and styles  
enables you to find your favorite one!

# PRODUCTS DETAILS

Sandals „Jabulayo“ – light and comfortable – are the best ones for leisure and work! We use natural materials to produce them.

# BIO MATERIALS

Our rubber is sourced in Nigeria or from our own rubber plantation in Liberia, and is produced ethically using natural rubber material. Again bringing needed employment to West African countries.

The sandal is bio degradable,  
and can be recycled which is really  
an added bonus.

# CHARITY PROJECT: WATER FOR EDUCATION

For every pair of jabulayo sandals bought the company contributes 10% of profits to the providing of water through wells to the local communities in West Africa.

Allowing kids to go to school, rather than fetching water at far off holes. Bringing the community closer together.

We believe profits and community support  
must be intertwined and  
given equal concern.

# WHO WE ARE

Producing over 300 million pairs a year, the company is committed to bettering the lives of our work force. Innovative programs like „finish and go“, allows workers flexible schedules and more time with their families. Our workers are not housed together they live at home nightly with their families.

Our packaging holding the sandals are Nigerian made, hand woven shoebags, produced in the local community, providing employment and offering true Nigerian craftsmanship to our global customers.

# WHAT WE DO

A Nigerian company, in business since 1962, producing sandals. We have provided support and employment for numerous generations of Nigerians. We contribute to the community through the building of schools and providing fresh water to the surrounding communities.
